

UNLOCK THE POWER OF DATA TO RESHAPE HEALTH AND SOCIAL CARE

DATA ANALYST INCLUDING POWER BI LEVEL 4 APPRENTICESHIP WITH INCLUSIVE MICROSOFT POWER BI CERTIFICATION

DIGITAL TRANSFORMATION TAKES TALENT

The Data Analyst including Power BI Level 4 Apprenticeship uses leading Power BI certifications to equip professionals with the range of digital skill sets needed to drive digital transformation.

Alongside online learning, work-based elements are completed over the course of the apprenticeship to apply new knowledge to real projects. The programme springboards individuals to use data to gain meaningful insights in their organisation and support NHS objectives such as providing health care professionals with data to improve the outcomes of delivery.

Learners can further enhance their skills via our cutting-edge digital learning platform, Cloud Academy, which offers 10,000+ hours of additional content such as videos, quizzes and labs in Big Data, Cloud, Information Security, Agile and Project Management.

Take tech further in the NHS

Overcome barriers to digital transformation by developing staff with the hard and soft skills to translate data challenges into digital solutions.

Power your potential, faster

Our digital learning programmes support the learner to be more successful in their assessment, at their workplaces and to stay engaged throughout their apprenticeship.

Simple procurement

It couldn't be easier to procure apprenticeships with QA. QA is on all the NHS primary procurement Apprenticeship routes including, NHS Crown Commercial Service DMP, NHS Shared Business Services and NHS Salisbury procurement framework.

The Data Apprenticeship Programmes being developed by QA support our need to empower our staff to operate effectively in the digital first environment.

Work Based Learning
Coordinator, Apprenticeship
Lead, Mersey Care NHS
Foundation Trust

QA has been a **provider of Apprenticeship talent** into leading NHS organisations for over 10 years in over 20+ NHS departments.

A fully funded programme designed to transform your talent and workplace

Data Analyst including Power BI Level 4 Apprenticeship

The Data Analyst Level 4 apprenticeship will build your skills and capabilities across NHS departments to analyse, interrogate and present technical data – helping you provide valuable insights for informed decision making and patient care.

Fully funded through your NHS Trust or NHS organisations' apprenticeship levy.

Upskill, Reskill or Recruit – Train your teams, or recruit new talent, in essential data skills – and progress them through lifelong capability.

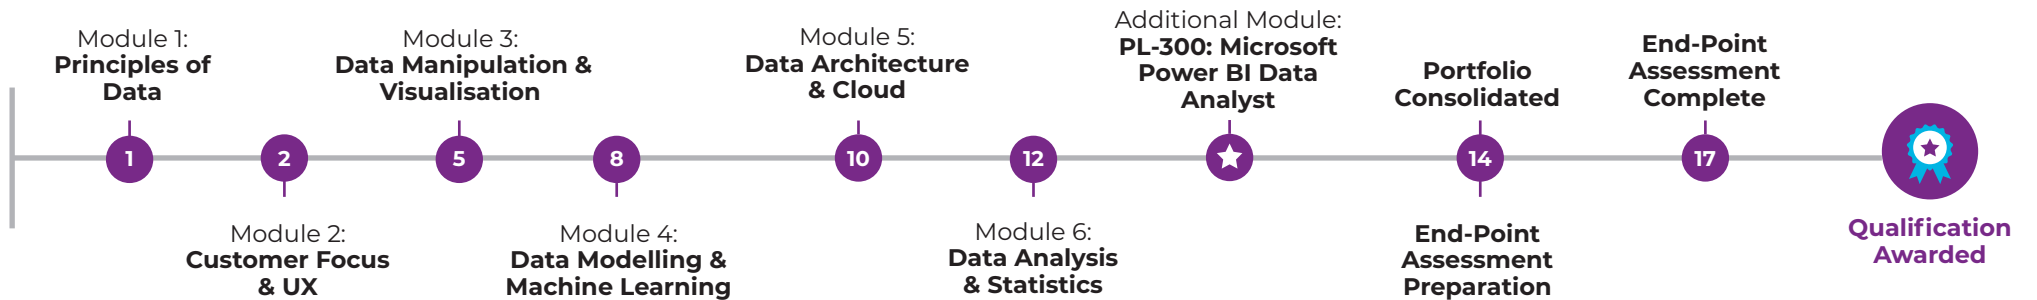

We are committed to recruiting incredible talent from diverse backgrounds through our market leading links with social mobility talent partners. QA supports Microsoft's Get On campaign to create 1.5million tech careers by 2025.
